

# HTC-4400

Heater Tape/Jacket Controller Unit

## Description

The HTC-4400 controller is an easy to use temperature controller unit, for mobile use in labs and industry.

The unit includes:

- digital heating regulator type HT
- 3m power output cable
- thermocouple type K, incl. connector and 3m cable

## Technical data

Size of casing:

H=60mm x W=130mm x D=150mm

Power supply:

100 to 230V AC

Max switching current:

8 Amp

Display resolution:

0,1°C up to 99,9°C

1°C from 100°C up to 999°C

Probe input:

thermocouple type J and K

Digital parameters settings:

- set-point, differential and neutral zone
- outputs realization time
- function and delay time digital input
- alarm delay time / buzzer operation
- probe calibration offset
- temperature unit of measure, °C and °F
- measure display filter (updating speed)
- password (to protect settings)
- ALARM (high/low temp, sensor fault)
- ON/OFF regulation direct/or reverse action with or without neutral zone
