

Complete Jacket System Supply

- Gasline tubings – valves – manifolds – bubblers -

ALD-tool, equipped with Hemi Heating Jackets

Technical data

Operating voltage:

12, 24, 110, 230, 240VAC

Maximum operating temperature

cleanroom/(non cleanroom):
220°C / (350°C)

Fabric:

PTFE coated (double sided)
fibreglass fabric

Insulation:

Aramide fibres

Cold Leads:

0,75sqmm Kapton insulated

Protection class:

IP 20

Thermal conductivity:

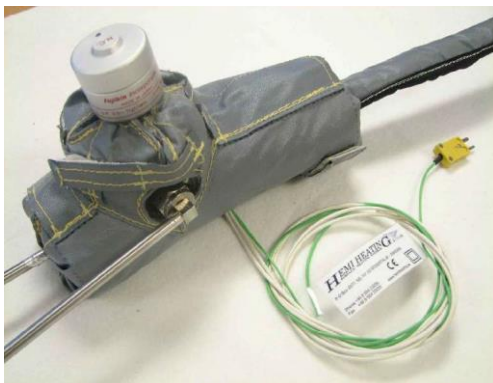

200°C:0,055W/mk

Closure:

By Velcro Nomex + PTFE fabric

Standard:

EN 60519-1 2003 + EN60519-2 2006

Thermocouple type K integrated inside jacket for optimum temperature control

Jacket mounted on a ALD 3-way valve

On site installation

Heated gas stick for precursor supply
